

Boomi DataHub Foundational Build

START YOUR MASTER DATA JOURNEY with a focused, foundational build designed to centralize and govern your most critical data domains. By establishing a trusted source of truth early, you create immediate value while laying the groundwork for scalable data management, integration, and future analytics.

CORE FEATURES OF DATAHUB FOUNDATIONAL BUILD

- ▶ **CENTRALIZED DATA HUB** – Consolidate data from multiple systems into a single, governed repository to create a trusted source of truth across your organization.
- ▶ **MATCH + MERGE ENGINE** – Automatically identify duplicates and reconcile records using configurable match rules and survivorship logic.
- ▶ **DATA QUALITY RULES** – Cleanse, standardize, and validate data to ensure consistency, accuracy, and usability across systems.
- ▶ **SYSTEM INTEGRATION** – Seamlessly ingest and publish data across key systems using scalable, API-driven integration patterns.
- ▶ **GOVERNANCE + VISIBILITY** – Apply business rules, tagging, and monitoring to enforce data standards and provide transparency into data lineage and quality.

1 MASTER DOMAIN

Up to 30 attributes under one domain (i.e.: Customer / Product / Employee)

3 INTEGRATED SYSTEMS

Two Inbound systems
One Outbound System

3 MATCH RULES

Configuration of up to three Match rules specific to the domain

2/2 DATA QUALITY RULES/TAGS

Configure data quality rules and configure automated tags

WHAT THE OFFERING INCLUDES: DELIVERABLES

1. Planning & Requirements

- ▶ Discovery workshop agenda
- ▶ Requirements traceability matrix (RTM) for DataHub and integrations
- ▶ High-level process/data flow architecture (HLD)

2. Design

- ▶ DataHub model design document (DHDD)
- ▶ Integration source-to-target mappings (STM)

3. Build & Configure

- ▶ DataHub model, data quality rules, survivorship, and tagging
- ▶ Data integrations
- ▶ Test-ready solutions

4. Test

- ▶ Unit test documentation
- ▶ Match iteration audit book
- ▶ UAT test plan (template provided)
- ▶ Production-ready solutions

5. Deploy

- ▶ Deployment Execution Plan
- ▶ Finalized solution documentation: RTM, HLD, DHDD, STM, & UAT Test Plan
- ▶ Validated deployment execution plan

6. Knowledge Transfer & Wrap-Up

- ▶ Solution walkthrough
- ▶ Solution design documentation (SDD)
- ▶ Transition/KT session

Not just powering the future—empowering it.

Attain Partners is a leading management, technology, and compliance consulting firm delivering services and solutions to advance client missions across the education, nonprofit, healthcare, and state and local government landscapes. We're an innovative and values-driven firm working to disrupt the status quo to change the world and improve the lives of those we serve.
